Summary

Computer Engineering undergraduate with experience building scalable backend systems using Spring Boot, Microservices, Apache Kafka, and Docker. Developed real-time applications with WebRTC and full-stack web applications using React and Next.js. Strong foundation in DSA, OOP, DBMS, and system design, seeking a Software Engineering internship to build high-impact products.

Technical Skills

Languages: Java, JavaScript, TypeScript, C++, C

Backend: Spring Boot, Node.js, Express.js, OAuth 2.0, Keycloak

Databases: PostgreSQL, MongoDB, MySQL

Frontend: HTML5, CSS, React.js, Next.js, Tailwind CSS

Systems & Architecture: Microservices, Event-Driven Architecture (Apache Kafka), RESTful API Design

Core CS Foundations: DSA, OOP, DBMS, MVC Architecture

Tools & DevOps: Git, GitHub, Docker, Kubernetes, CI/CD, Jenkins, Postman, VS Code, IntelliJ IDEA, Vercel, Render, Netlify

Education

R.C. Patel Institute of Technology, Shirpur 2023 – 2027

B.Tech, Computer Engineering — CGPA: 8.6/10

Maharashtra State Board 2023

Higher Secondary Education (HSC), Science — 89%

Maharashtra State Board 2021

Secondary School Education (SSC) — 99%

Experience

Engineering Intern June 2026 – Aug 2026

eInfoChips, An Arrow Electronics Company

- contributing to the development of a hardware-integrated gesture detection system that detects and interprets human hand movements using embedded sensors and software for real-time motion recognition.

Full-Stack Developer Oct 2024 – Present

Akatsuki Coding Club, RCPIT

- Designed a centralized platform (Akatsuki Project Hub) to manage 20+ club projects, including a role-based access control (RBAC) admin dashboard for permissions and visibility.
- Automated the project approval workflow in Node.js, cutting manual review effort by 30% across all submitted projects.

Freelance Frontend Developer April 2026

Accredian

- Developed a freelancing platform clone in Next.js with dynamic routing, cutting client-side page load time by 30% through code-splitting and route-level optimization.
- Designed 10+ reusable React components powering 5+ application pages, establishing a consistent component pattern for the codebase.

Projects

PulseTrack - AI Fitness Application | *Spring Boot, Microservices, Kafka, React, Docker* 🐙 Code

- Built a distributed microservices-based fitness application comprising 3 services (User, Activity, and AI services) using Apache Kafka for asynchronous event-driven communication and Eureka for service discovery.
- Implemented polyglot persistence using PostgreSQL and MongoDB based on service-specific data requirements, and secured APIs with Keycloak, OAuth 2.0, and JWT-based authentication.

DisasterConnect — Community Disaster Response Platform | *MERN, Socket.IO, Leaflet* 🌐 Live

- Engineered disaster response platform with 4 user roles and 10+ core modules, including SOS alerts, resource requests, missing-person reports, relief camps, donations, and volunteer operations, with REST APIs and role-based access control.
- Implemented real-time communication with Socket.IO, geolocation-based Leaflet maps, JWT authentication, Cloudinary image uploads, and security using Helmet, rate limiting, bcrypt, and input validation.

Signalist — Stock Market Analytics | *Next.js, MERN Stack, Inngest* 🌐 Live

- Engineered a full-stack analytics platform integrating the Finnhub API and TradingView widgets, delivering real-time stock prices, interactive charts, and market news through a Next.js front end and Express REST APIs.
- Optimized personalized daily market summaries and watchlist alerts using Inngest event-driven workflows, triggering scheduled email updates based on each user's tracked stocks.

Achievements & Certifications

- German Language (A1)** — International Certification, Goethe-Institut Pune; proficient in basic professional communication.
- Employability Skills Program** — Participated in 7-days employability skills program conducted by Naandi Foundation and Mahindra Pride Classroom.
- National Service Scheme (NSS)** — Completed a 5-day residential camp focused on community service and leadership initiatives.
